

Slot8 – Widget, thiết kế widget

1. GridLayout:

app:layout_column="0"=> nằm ở cột nào

app:layout_row="2"=> line 2

app:layout_columnSpan="2"=> chiếm bao nhiêu cột

app:layout_rowSpan="2"=> chiếm bao nhiêu hàng

2. Widget: is view in layout

ex: Button, EditText, TextView

=> Layout = Sum of Views

3. Font

Target: bring font to android

`Typeface.createFromAsset();` => add font from Asset to Android

`Object1.setTypeface(theFont)` => set font to the object

3. Theme, Style:

Theme = Collect some styles

`<Button style=@style/Style1/>`

=> Define the Style1 in `value/style.xml`

4. ToogleButton (status on-off)

`background=@drawable/toogle`

=> Define status on-off for toogle button: create the `congtao.xml` in drawable folder and using `<selector>`

```
<selector>
    <item....on/>
    <item.....off/>
</selector>
```
